Community Purchase Program

FAQ

Is this really a free service?

Yes! Once you start a device buyback with us, you can elect if you want the Community Purchase Program. Once your qualification status is determined, you can take part in this feature at absolutely no cost to you,

Do I have to share this with my community or can I keep it to myself?

As the leader of the device buyback, you can choose whoever you would like to distribute this to. You can exclusively choose seniors who are graduating, specific teachers, parents of students, everyone in the school system, or absolutely no one. There's no restrictions for who you can share it with. It's all up to you.

What do I need to do to make a community sale happen?

The only thing you're required to do in order for a community sale to happen is to complete a device buyback with us. Once you're qualified for the Community Purchase Program, we handle every part of the process including setup, management, shipping, and returns.

How long does the code last for?

Your personal portal will be open for 14 days where you can use the discount code as much as you would like with a limit of one per person. After that, you can still shop on the site but with no discount.

Do we have to buy our own devices back?

You can elect to buy your devices back or shop from the entire webstore. However, quantities of other webstore devices are extremely limited whereas your device quantities are held during the buyback process.

How much of a discount is there on the devices?

The discount is largely determined by the amount and value of your device buyback. The larger and more valuable batch of devices, the more likelihood of a higher discount for you.
